

# HIGH-PERFORMANCE BUILDERS' SERIES

Far Infrared Heating Panels

By **BRZ**brands

BRZ Brands high-performance builders' series panels are designed for residential and commercial construction as an energy-efficient alternative to conventional heating solutions. The panels can be integrated in new construction, or easily refit for remodeling projects. They also offer exceptional value for spot or zone heating applications.

BRZ Brands Far Infrared panels can be also be used in outdoor living, sunrooms, schools, restaurants, etc., or anywhere low-energy consumption heating is desired.

## Easy Installation and Operation

- Ductless and simple to wire
- Control via regular and smart thermostats, switch or presence detectors
- Flush or angle mount on wall or ceiling
- Panels can be wired individually, in series, or by zone for maximum efficiency
- Virtually no required maintenance, simply wipe clean with a damp cloth, no filters, no ducts, no moving parts

## Applications

- Any room of the home
- Garages, Carports, and workshops
- Outdoor dining/event areas
- Conference rooms and lobbies

Ceiling Grid Panel

Frame Options

Ceiling Mounted Panel

BRZ Brands panels have a rated life expectancy of more than 25 years.

Far infrared heating is considered the most energy-efficient method of heating, substantially reducing homeowners' heating costs.

BRZ Far Infrared Panels do not dry the air, which improves comfort and reduces the need for humidifiers. They do not use fans, so they don't stir the dust or allergens.
